

ENCO's HazPack™ is an economical UN/DOT approved cubic yard box designed to address today's complex solid hazardous waste disposal challenges.

As the most economical and efficient hazmat cubic yard box on the market today, the HazPack is constructed of sturdy triple-wall corrugated board and is rated for either 1,000lb (454kg) or 2,000lb (907kg) capacity.

The HazPack is ideal for countless hazardous and non-hazardous waste streams including contaminated soils, plating sludge, asbestos and lead based materials, and contaminated personal protective
